## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01 November 2005 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Simmons US 2,070,377.

Simmons '377 teaches a bottle closure comprising first flexible portion (12), second elastic portion (9), downwardly extending pull tabs (11) and reinforcing lip (19).

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heilborn US 2,388,915 in view of Simmons US 2,070,377.

Heilborn '915 teaches a nursing nipple with a frustum (6) and bulbous terminal end (9) with a textured surface, but fails to teach the claimed pull tabs and reinforcing rib.

Art Unit: 3727

Simmons '377 teaches downwardly extending pull tabs (11) with a reinforcing rib (19).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the nipple of Heilborn '915, providing the pull tabs and reinforcing rib of Simmons '377, motivated by the benefit of providing means to assist a user in removing the nipple from a bottle.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Allowable Subject Matter***

7. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***
